Project Overview

About CraftWave

CraftWave is a modern e-commerce platform built to showcase handcrafted goods. The project focuses on a clean, editorial aesthetic with smooth UX flows, accessibility standards, and mobile-first design.

Project Goals

- Build a visually striking storefront
- Ensure full mobile responsiveness
- Integrate an AI-assisted workflow
- Achieve accessibility compliance
- Create a scalable design system

Project Details

TIMELINE	2 Weeks
ROLE	Solo Designer & Developer
PLATFORM	Web (HTML/CSS/JS)
AI TOOLS	Claude Code, Claude AI

No Framework

Pure HTML/CSS/JS keeps the site lean, fast, and dependency-free.

AI-First Workflow

Claude AI accelerated ideation, code generation, and review cycles.

Dark/Light Hybrid

Strategic use of dark/light sections creates visual rhythm and drama.

The Process

A structured, iterative design and development workflow

01

Discovery & Research

✦ FigJam

- Competitive analysis
- User persona mapping
- Content audit

02

Wireframing

✦ Figma

- Lo-fi sketches
- Information architecture
- Flow diagrams

03

Visual Design

✦ Figma + CSS

- Style guide creation
- Component library
- Dark/Light system

04

Development

✦ Claude Code

- HTML structure
- CSS animations
- JS interactions

05

Testing & Launch

✦ Browser DevTools

- Responsiveness checks
- Accessibility audit
- Performance test

Color System

A deliberate palette built for contrast, mood, and purpose

#1A1A1A
Surface Dark

Backgrounds, containers

#2D2D2D
Surface Mid

Card backgrounds, dividers

#F0F0F0
Surface Light

Light-mode backgrounds

#888888
Muted

Secondary text, icons

#FFFFFF
Pure White

Primary text on dark

#D32F2F
Danger Red

Alerts, remove actions

#FAFAFA

#F5F5F5

#E0E0E0

#4CAF50

#444444

#EEEEEE

Primary Accent — #7C5CFF

Highlight Accent — #FF6B35

Every color serves a purpose. No decoration without function.

Type System

Inter

PRIMARY TYPEFACE

400	Regular
500	Medium
600	SemiBold
700	Bold
800	ExtraBold

DM Sans

SECONDARY TYPEFACE

- Body copy & descriptions
- UI labels & micro-copy
- Navigation items
- Form inputs & placeholders

TYPE SCALE

Display 24px — Hero headlines, large callouts

H1 20px — Page titles

H2 16px — Section headings

H3 13px — Card titles, sub-sections

Body Lg 11px — Featured body copy

Body 9px — Default paragraph text

Caption 7.5px — Labels, metadata, footnotes

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj

Character specimen — Inter & DM Sans

Inter for headings + DM Sans for body = clarity without compromise.

Section Breakdown

#01

Navigation

Smart sticky nav with logo, links & cart icon

Fixed sticky

#02

Hero

Bold headline + CTA over high-contrast background

Full viewport

#03

Products

Responsive product cards with hover states

4-col grid

#04

About

Brand story with editorial image + copy

Split layout

#05

Features

USP highlights with animated icon blocks

3-col icons

#06

Newsletter

Minimal email capture with validation

Centered form

#07

Testimonials

Customer quotes in rotating card layout

Card carousel

#08

Footer

Full footer with sitemap and social links

4-col links

SITE LAYOUT — WIREFRAME OVERVIEW

Built with Claude AI

AI-powered design and development — a new creative workflow

Claude Code

The AI pair-programmer that wrote, reviewed, and debugged the entire codebase interactively.

Claude Skills

Pre-built skill templates for PDF generation, image processing, and data transformation.

Superpowers

Instant component ideation, accessibility checks, responsive layout advice, and instant refactors.

DEVELOPMENT WORKFLOW

SKILLS USED:

PDF Generation

Image Processing

Code Review

Component Design

Accessibility

Responsive Layout

Git Commits

Documentation

Features & Techniques

*

Sticky Navigation

Smart nav that locks at top on scroll with smooth blur backd...

```
position: sticky;
top: 0; z-index: 100;
```

+

CSS Grid Layout

Fully responsive product grid that adapts from 1 to 4 column...

```
display: grid;
grid-template-columns:
  repeat(auto-fit,
    minmax(280px, 1fr));
```

~

Hover Animations

Smooth scale and shadow transitions on all interactive eleme...

```
transition: transform
  0.3s cubic-bezier
  (0.4, 0, 0.2, 1);
```

#

Dark Mode System

CSS custom properties enable instant theme switching system-...

```
[data-theme='dark'] {
  --bg: #0A0A0A;
  --text: #FFFFFF;
}
```

@

Form Validation

Real-time HTML5 validation with custom styled error states.

```
input:invalid {
  border-color: #D32F2F;
  box-shadow: ...
}
```

^

Performance Opt.

Lazy-loaded images and optimized assets for fast page loads.

```
img { loading: lazy;
  decoding: async;
  width: 100%; }
```

RESPONSIVE BREAKPOINTS

Desktop
1200px+

Tablet
768-1199px

Mobile
< 768px

“Design is not decoration. It’s communication.”

— Guiding principle behind CraftWave

What I Learned

- 1 AI tools dramatically compress ideation-to-implementation cycles
- 2 Strong typographic hierarchy does more work than any decoration
- 3 Dark/light contrast sections create visual rhythm and reader engagement
- 4 Constraint-based design (no frameworks) deepens CSS fluency
- 5 Accessibility and aesthetics are complementary, not competing goals
- 6 Documenting decisions as you build is as valuable as the build itself
